

DINH GIA AN

Frontend Developer (Next.js / React)

Thu Duc City, Ho Chi Minh City | +84 856 562 424 | dinhgiaanforwork@gmail.com

Portfolio: dinhgiaan.vercel.app | GitHub: github.com/dinhgiaan | LinkedIn: linkedin.com/in/dinhgiaan

Professional Summary

Frontend Developer with 5+ months of professional experience at Mona Media and Tikera, specializing in Next.js, TypeScript, and scalable UI architecture. Delivered 3 client projects on schedule, built 20+ pixel-perfect interfaces, and maintained 90+ Lighthouse scores in production. Experienced with Redux Toolkit, modern state management patterns, and Agile/Scrum workflows. Currently deepening English proficiency (TOEIC preparation) while continuing to build personal projects. Seeking a Junior Frontend Developer role to contribute to impactful products and grow within a collaborative engineering team.

Technical Skills

Languages: JavaScript (ES6+), TypeScript

Frontend: React.js, Next.js, HTML5, CSS3, SCSS, Tailwind CSS, Responsive Design

State Management: Redux Toolkit, Zustand, SWR, Axios

Backend: Node.js, Express.js, MongoDB, RESTful API, JWT Authentication

UI/UX: Figma, Component Reusability, Web Vitals Optimization

Tools: Git/GitHub/GitLab, Postman, Vercel, Render, Agile/Scrum

UI Libraries: MUI, Ant Design, Shadcn

Professional Experience

Tikera — Frontend Developer Intern

November 2025 – February 2026 | Ho Chi Minh City

- Maintained and extended a reusable component library within a Next.js e-commerce codebase, reducing duplicated UI code across 8+ modules and improving team development speed.
- Integrated RESTful APIs with proper error handling, loading states, and edge case coverage, improving frontend reliability for checkout and product listing flows.
- Collaborated with backend developers to align on API contracts, reducing integration bugs and ensuring smooth data flow across product, cart, and order modules.

Mona Media — Frontend Developer (Probation)

September 2025 – October 2025 | Ho Chi Minh City

- Converted 20+ Figma mockups into responsive, pixel-perfect interfaces using Next.js, Redux Toolkit, and Tailwind CSS, SCSS, reducing design-to-code time by 30%.
- Integrated 15+ RESTful APIs with comprehensive error handling, improving data flow reliability by 40% and enhancing overall user experience.
- Spearheaded the creation of 6 reusable UI components per project using Next.js and Tailwind CSS, SCSS, accelerating development cycles and improving frontend code maintainability by 15%.
- Participated in 3+ code reviews and daily standups, maintaining 95% code quality standards across 3 client projects delivered on schedule.

Personal Project

Online Book Reading Platform (NovelNest)

January 2025 – August 2025

Demo: [novelnest.tech](#) | Client: [GitHub](#) | Server: [GitHub](#)

- **Engineered a full-stack browser-based EPUB reader from scratch** using Next.js and TypeScript, handling file parsing, responsive layout rendering, and end-to-end payment flow with PayOS.
- Implemented JWT-based authentication with secure session management and role-based access control for readers and content managers.
- Integrated PayOS payment gateway with full error handling, webhook support, and user feedback - supporting subscription and one-time purchase flows.
- **Achieved 95+ Lighthouse score** on production, with SEO optimization and mobile-first responsive design.

Stack: Next.js, TypeScript, Tailwind CSS, MUI, Zustand, SWR, Axios, PayOS, Express.js, MongoDB, JWT

Team Project

Online Programming Learning Platform (CodeGuru)

August 2024 – October 2024

Role: Frontend & Backend Developer, Team Lead | Team size: 3

Demo: [Video Demo](#) | Client: [GitHub](#) | Server: [GitHub](#)

- Lead frontend architecture and task coordination across a 3-person team, delivering the full platform within a 2-month timeline.
- **Built 20+ reusable components** with Redux Toolkit for state management, improving development efficiency by 40% and enabling consistent UI across the platform.
- Developed backend APIs with Express.js for user management, course content delivery, and Stripe payment integration.
- Iterated on UX based on peer feedback and usability testing, improving course navigation and video streaming experience.

Stack: Next.js, TypeScript, Tailwind CSS, MUI, Redux Toolkit, Axios, Stripe, Express.js, JWT

Education

HUFLIT University

Major: Software Development

October 2022 – June 2026 (expected)

Additional Information

Languages: English — Intermediate (proficient in reading technical documentation)

Availability: Immediate start · Open to hybrid or remote
